

## 设备简介

产品介绍

300Mpa

**Applications** For sand making, it can also be widely used in metal mines, cement plants, building materials industries, etc.

**Material** used for medium and fine crushing of various ores and rocks with compressive strength below 300Mpa, such as iron ore, non-ferrous metal ore, basalt, granite, limestone, quartzite, sandstone, pebbles, etc.

**Product introduction** The compound cone crusher is a comprehensive cone crusher with spring and hydraulic cylinder in the cone crusher. It has large crushing force, high efficiency, high processing capacity and low operating cost. Uniform force and long service life. Overload protection, hydraulic / spring safety system, safe and efficient.

## 产品参数

Model: PYFB1620-2122

Type	Model	Chamber Type	Main Diameter (mm)	Adjusting Range of Discharge Opening (mm)	Max Feed Size (mm)	Capacity (t/h)	Max Motor Power (kw)	Weight (kg)	Overall Dimensions (L*W*H)mm
