### 设备简介

HD

The company's new high-capacity HD series single-cylinder hydraulic cone crusher is widely used in construction, mining, building materials, metallurgy, water conservancy and other fields due to its high performance, high efficiency, high reliability and high cost performance. Changed the concept of fine crushing, using advanced laminating crushing technology to make the broken particles fine and uniform, high degree of automation, suitable eccentricity, through the discharge opening and automatic uniform feeding setting, the raw material is in the specially designed crushing cavity, and the layer is compressed and broken.
